Professor Joshua Lederberg  
Department of Medical Genetics  
The University of Wisconsin  
Madison 6, Wisconsin  
U.S.A.

Dear Joshua:

Many thanks for your last letter. I was glad to get your registration form and have taken care of the advance payments. It would be wonderful if you and/or Esther would want to present a paper in the session on "Microbial Genetics". If you would be able to do so and send in an abstract in the next few weeks, it would be very helpful.

I quite agree with you <sup>with regard to</sup> ~~about~~ absence from the formal functions. Eva and I shall most definitely avoid them. We should be delighted indeed to have a chance to see you more in private instead, whenever you have time. I hope to limit my functions in connection with the congress to a minimum, primarily in connection with the sessions on genetics.

We hope that you <sup>will</sup> ~~shall~~ stay in Stockholm as long as you can. We shall be glad to take care of the living expenses of both of you as long as you can stay. We can discuss the details of the financial arrangements in Madison; by that time I hope that the Congress has been able to make up its final budget.

I have planned to proceed from Knoxville to Madison on the morning of April 6. However, I have nothing against going earlier on the 5th if there is a suitable connection. I was rather hesitant to impose on you with visiting immediately before the symposium, knowing how busy and exhausted you probably will be. If you would like me to come with you on Saturday, however, I shall be glad to do so.

Looking forward to seeing you both soon,

Yours as ever,

George Klein
